

### Coming up in the next issue of 3n1media nSite:

Is Google taking over the world? Its apps and services are handy, but should you trust it with your information?

### 3n1media Welcomes Bill Hart to the Team

Bill comes to us with a professional background of over 20 years in the IT world. Bill's range of IT experience includes operations and engineering in software development, wide area networking, messaging technologies and Microsoft centric software. He enjoys spending his spare time with his wife and four children, hiking, sailing and trying to grow the best tasting tomato from his garden.

### Have you checked out our new CMS?

Our new Content Management System is ready for you to use to update your website. Visit it at [cms.3n1media.com](http://cms.3n1media.com). Also, [read our blog](#) to find out what's new.

### Tech Tip: Avoid Virus-Warning Pop Ups.

We've seen a recent rash of PCs infected with viruses. Many are coming from fake "virus-warning" pop-up windows that look legitimate. DO NOT click anywhere on these windows. [Read more here.](#)

Dear [member\_name\_first],

Over the past several years, 3n1media has served the web-development needs of clients in diverse fields. During this time, we have worked hard to keep our web systems up to date with the ever-evolving technologies and trends of online marketing. And because an up-to-date website is essential to keeping your brand relevant and your audience engaged, we have put together a new **website re-skin package** to serve your ever-changing web needs and to allow you to take advantage of our updated features and approaches.

We are excited to offer the package to **existing clients whose websites we have managed for two or more years**. The package is available for **\$1,000** and includes:

- **A New Design for Your Site:** We will work with one of our trusted designers to give your site a brand new look, based on your needs and preferences. A redesign will give your brand a fresh facelift that will engage your audience and encourage your website's visitors to explore and reconnect with your content. Furthermore, your website's new look will harness the power of new technology. For instance, because of the larger size of standard computer monitors, websites need a wider design to appear up to date and engaging. We will make sure that your site's look and feel measure up to the cutting-edge standards of 2010 and beyond.
- **Integration of New Web 2.0 Features:** As 3n1media has continued in the business of web development, we have done our homework to keep up with the times. That means that we have developed new features and coding to adapt to the new possibilities of Web 2.0. Your re-skin will give you the opportunity to integrate our new features into your existing web presence. These features include social media integration, new content types, and much more. See the list below for more new features of our systems.
- **An Opportunity to Address Structural Needs:** While a re-skin would not involve a complete overhaul of your website, you will have the opportunity to address key structural and coding issues. So this is a good time to make specific structural changes in response to needs you have developed over time without having to start from scratch.

Our goal is to give our clients the opportunity to make powerful improvements to their existing websites without having to pay for a complete overhaul. If you are interested in updating your website in a fraction of the time and for a fraction of the cost involved in its initial development, contact us today. We're looking forward to serving you.

Sincerely,

Sean Wright
